Dodge Neon instrument cluster “plug-n” modules

Model years 2000 – 2005

Race-up your interior

Simco, the designer of OEM instrument clusters for top specialty vehicle manufacturers and aftermarket gauges, now produce their patented technology and racing-inspired designs specifically for the consumer market. Our “plug-n” modules are the newest and easiest way to customize your car with step-by-step instructions in just 45-minutes.

Features

- Patented pre-calibrated analog gauge module, ready to install into your existing instrument cluster circuit board
- NEW – Performance Speedometer: 180 mph for the SRT-4 version and 140 mph for the standard versions
- Classic white and silver series custom race graphics
- Aluminum black enhanced pointers
- Electro-illuminated graphic backlighting
- Patented “easy-glow” lamp connection for dimming control from vehicle
- Patented micro air-core movements for “plug-n” compatibility
- Maintains original vehicle miles
- 12-month product warranty
- Step-by-step, hassle-free installation instructions
- Online forms and technical support

Important: The “plug-n” module does not completely replace the original vehicle instrument cluster. The original instrument cluster circuit board must be utilized and function properly.

We create the vehicle enhancements that “Drivers like to see”.

Our gauges combine custom racing graphics with “indiglo” style lighting and black aluminum pointers all in a patented pre-calibrated plug-and-play package.
